# PEDIATRIC Endocrinology

*Journal of the Pediatric Endocrine Society*

**Pediatric Vaccines.** TBHC recommends that all children receive their scheduled pediatric vaccines as soon as they are eligible. Along with the regularly scheduled immunizations, don't forget to speak with your pediatrician about your child's eligibility for this year's Covid-19 vaccine (which TBHC offers all kids, six months and older), this year's seasonal flu shot and the new respiratory syncytial virus (RSV) vaccination. For information about the pediatric Covid vaccine, visit [tbh.org/vaccine](https://tbh.org/vaccine).
